# Section 1: Introduction

There was a high demand for a plugin/module that allowed clients to ‘easily’ update their contact information. Doing this via a WYSIWYG was the best solution. However they also want to add additional fields to the contact form. Spinning Planet have created a system that allows the admin to create custom forms that emails multiple recipients and stores the contact message into the database, insuring that no message gets lost.

Etiam porta sem malesuada magna mollis euismod. Nullam id dolor id nibh ultricies vehicula ut id elit. Maecenas sed diam eget risus varius blandit sit amet non magna. Nullam id dolor id nibh ultricies vehicula ut id elit.

Integer posuere erat a ante venenatis dapibus posuere velit aliquet. Maecenas faucibus mollis interdum. Nullam id dolor id nibh ultricies vehicula ut id elit. Curabitur blandit tempus porttitor.

Cras justo odio, dapibus ac facilisis in, egestas eget quam. Cras justo odio, dapibus ac facilisis in, egestas eget quam. Donec sed odio dui. Curabitur blandit tempus porttitor. Sed posuere consectetur est at lobortis.

* Your Name:	<input type="text"/>
* Your Email:	<input type="text"/>
* Message Subject:	<input type="text"/>
* Your Message:	<div></div>
* Please Enter Code:	<div>595550</div> <input type="text"/>
* indicates a required field	
<div>Submit</div>	

# Section 2: Features

The plugin/module has the ability to:

1. Display Contact information
2. Edit Contact information via a WYSIWYG
3. Display a Contact Form
4. Edit and rearrange Contact form fields
5. Access edit functions from the public side (if logged in)
6. Control email addresses (message recipients)
7. Options to save to Database
8. Hide/Show either contact information and/or Contact form
9. Edit the thankyou message
10. Editable html template

# Section 3: Installation & Upgrading

Installing the plugin/module is straight forward. If you have installed an e107 Plugin/module before, it is the same as any other.

## Installation

Unzip the ContactUs.zip file and copy the files to the plugin/modules directory or (if available) upload the ContactUs.zip file via the plugin/module manager.

Here the plugin/module will be available for you to install. Click install.  
Once installed you can configure the plugin/module.

## Upgrading

Go to the plugin/module Manager. Scroll to the ContactUs Module and click upgrade. Thats it, all done!

# Section 4: Requirements

The ContactUs plugin/module requires another plugin/module to be installed and configured.

## **SP\_jQuery (version 1.1)**

1. Needs to be installed (Standard e107 Install procedure)
2. jQuery needs to be activated and needs to be version 1.5.2
3. jQuery UI needs to be activated and needs to be version 1.8.2

## Section 5: Configuration

The ContactUs plugin/module can be configured under:  
Admin --> plugins/modules --> ContactUs

Form Here you can alter the main preferences of the plugin/module. Adjust the Contact Information, Alter the contact form and view submitted messages.

All Areas are accessible via the right hand panel, Including this Readme document

## ContactUs Options

► [Edit ContactUs Information](#)

► [Edit ContactUs Form](#)

► **ContactUs Settings**

► Submitted Messages (1)

► [Readme](#)

## Main Preferences:

ContactUs Configuration

Send to Email Addresses:

support@spinningplanet.co.nz

Add Email

Send Message to Recipient:

Yes

Save Messages to Database:

Yes

Show ContactUs Information:

Yes

Show ContactUs Form:

Yes

Thankyou Message:

B I U ABC A Format Font size

Path:

Save Settings

Here is the layout of the ContactUs plugin/module preferences.

- **“Send to Email Addresses”** You can add multiple email address by clicking **“Add Email”**. This will display an additional text area to add an email address.
- **“Send Message to Recipient”** allows the user that fills out the contact form to receive a message also.
- **“Save Messages to Database”** can enable the messages sent via email to be also stored in the database, available for the admin to view in the **“Submitted Messages”** section
- **“Show ContactUs Information”** displays or hide the contact information
- **“Show ContactUs Form”** displays or hide the contact form
- **“Thankyou message”** configures the text the user will see once the contact form has been submitted.

## Section 6: Languages

Currently the ContactUs plugin/modules only displays in English. However the plugin/module is fully configurable to display in other languages. Only requirement would be to create the new language file under the Language folder in the ContactUs plugin/module.

# Section 7: Acknowledgements

The plugin/module was designed and coded from scratch by Ben Odering of Spinning Planet Ltd. However a large knowledge base from both the e107 and jQuery community were utilised in creating the plugin/module. So many thanks for the time, resources and patience of both communities.

# Bug Reports / Feature Requests

All bug fixes and feature requests to be sent to:
